 * Activity 5
 * References:
 */

```

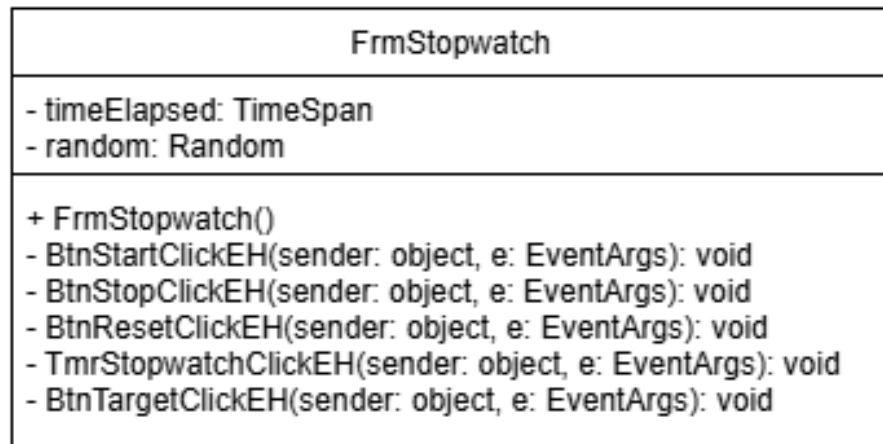

Figure 2-3: Screenshot of current state of the project's UML diagram.

Part 2: Activity Challenges

Section 3 – Whack-A-Mole Challenges

Screen Shots

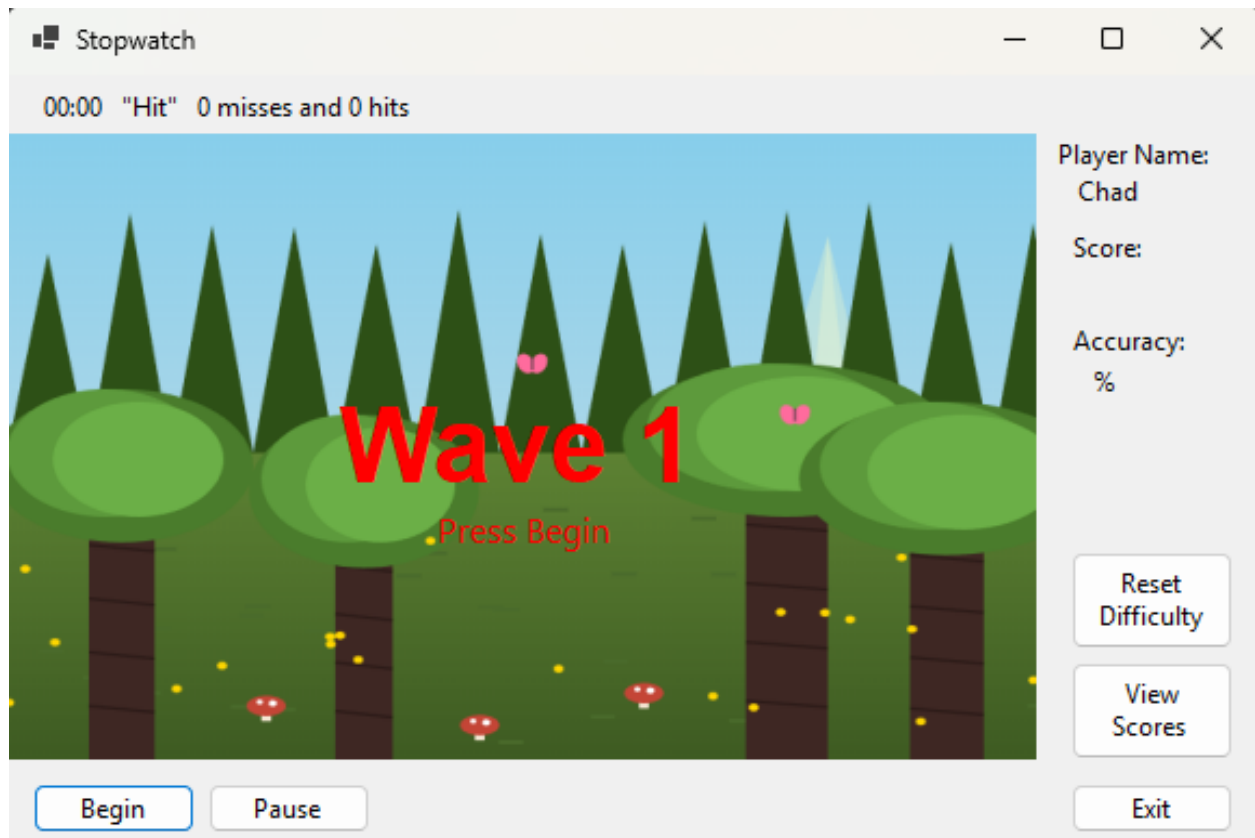

Figure 3-1: Section 3 Activity challenges

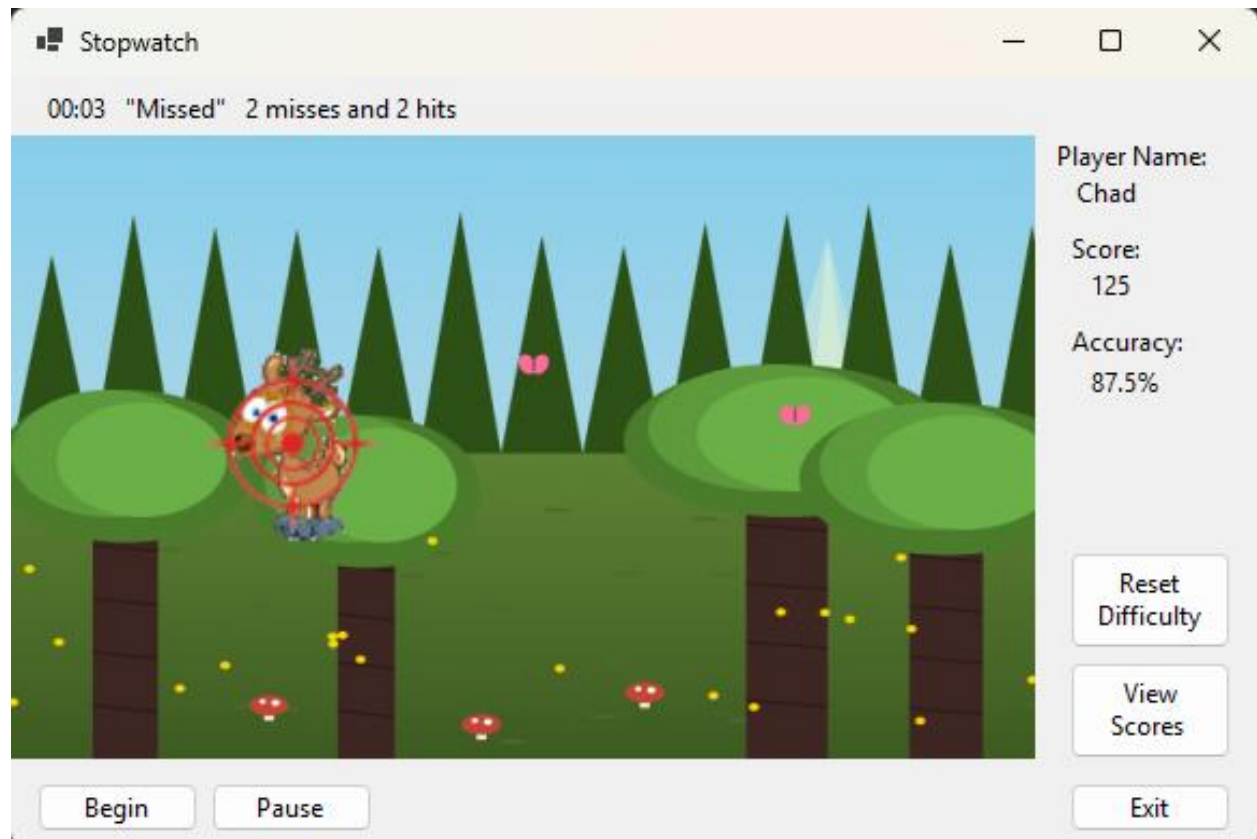

Figure 3-2: Screenshot of game in action

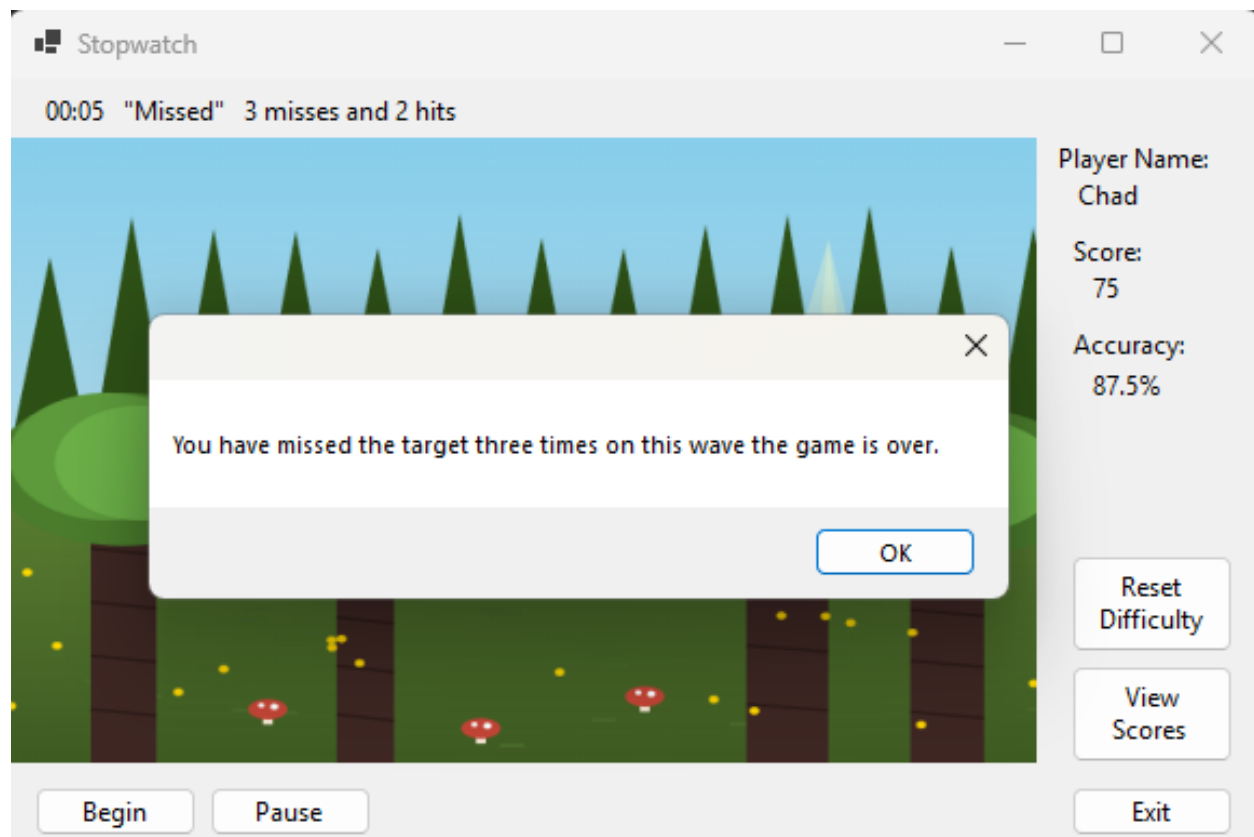

Figure 3-3: Screenshot of Game Ending due to missing too many times

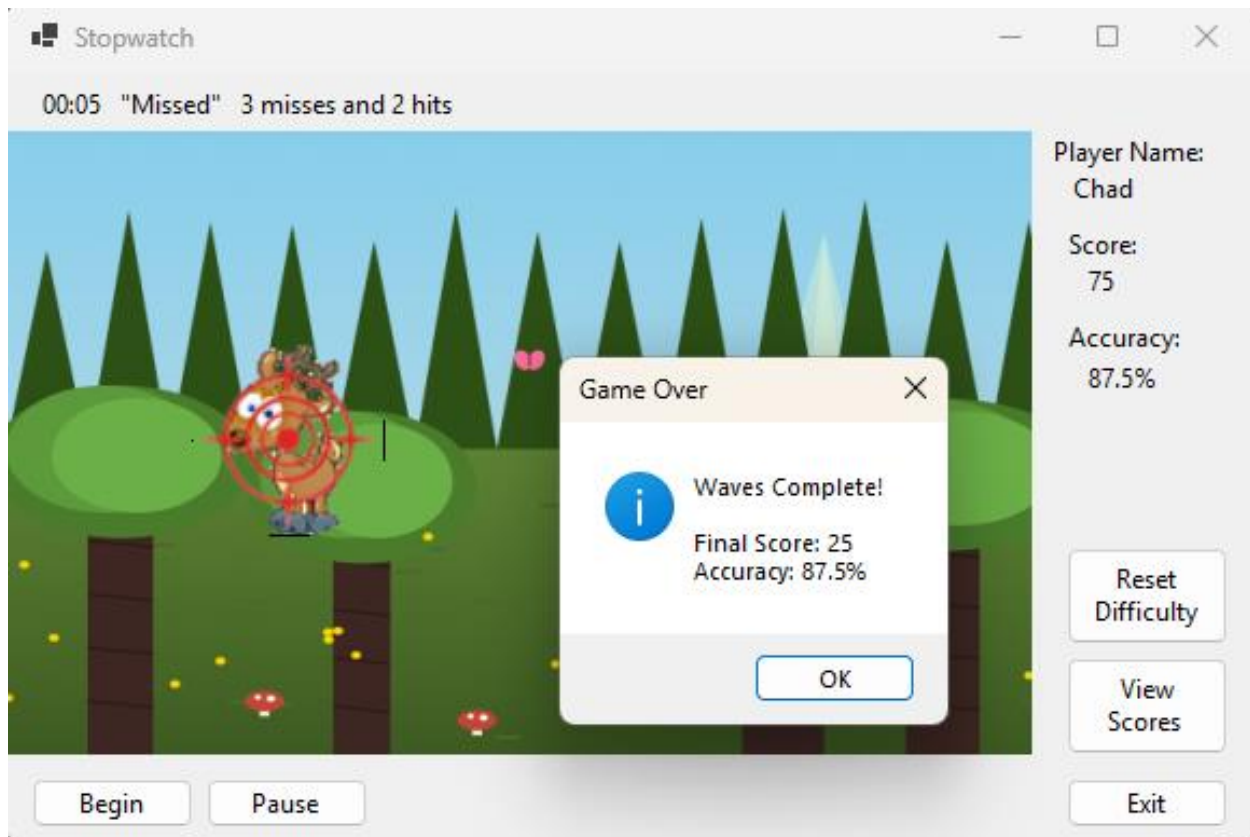

Figure 3-4: Screenshot of notification you receive when your game ends for what ever reason

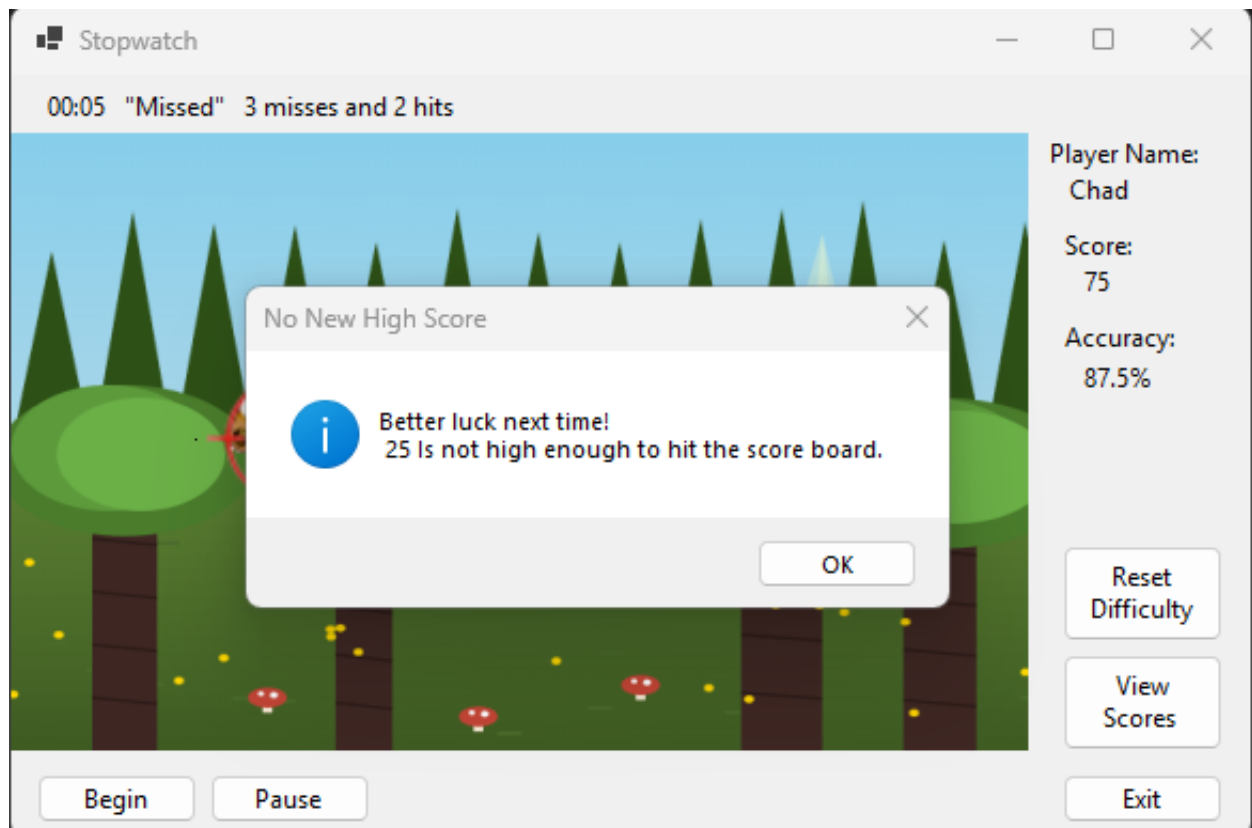

Figure 3-5: Screenshot of notification you receive when you didn't make it on the leader board.

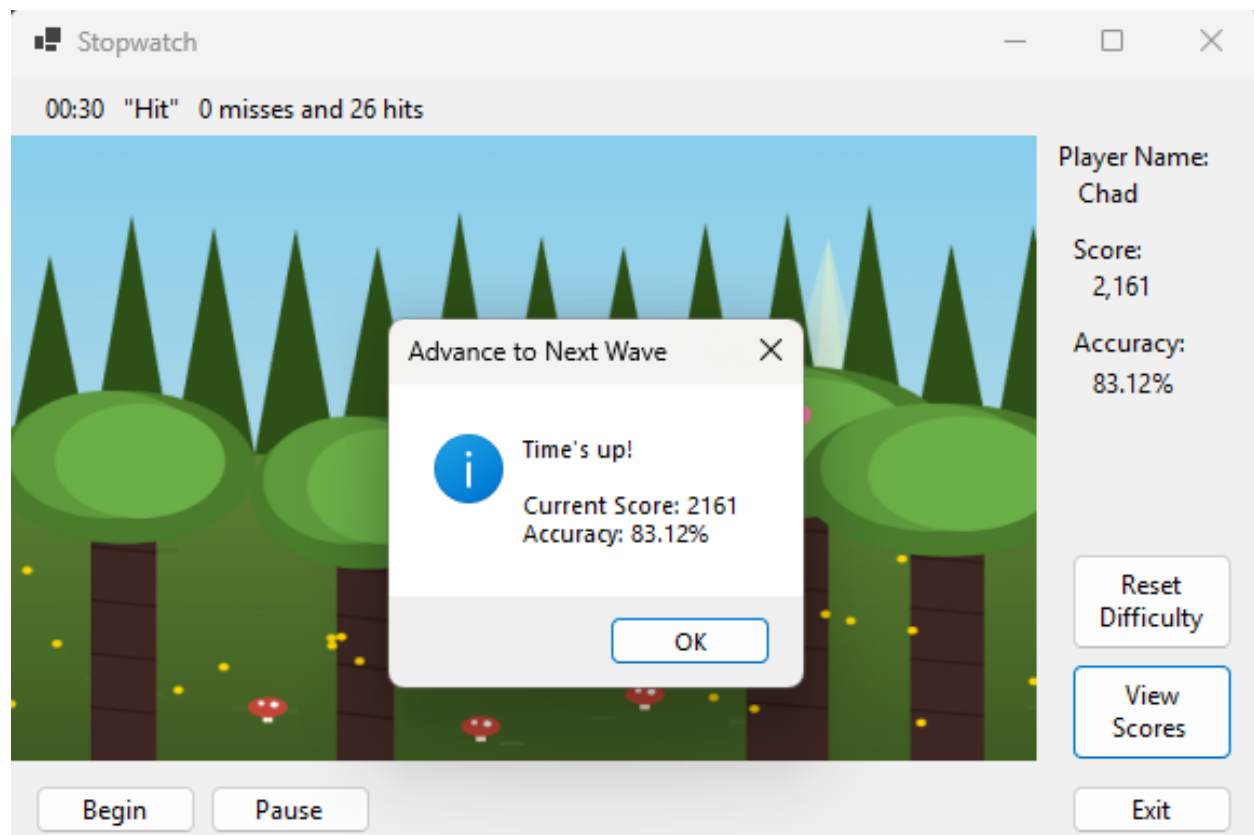

Figure 3-6: Screenshot of the game when you finish a wave

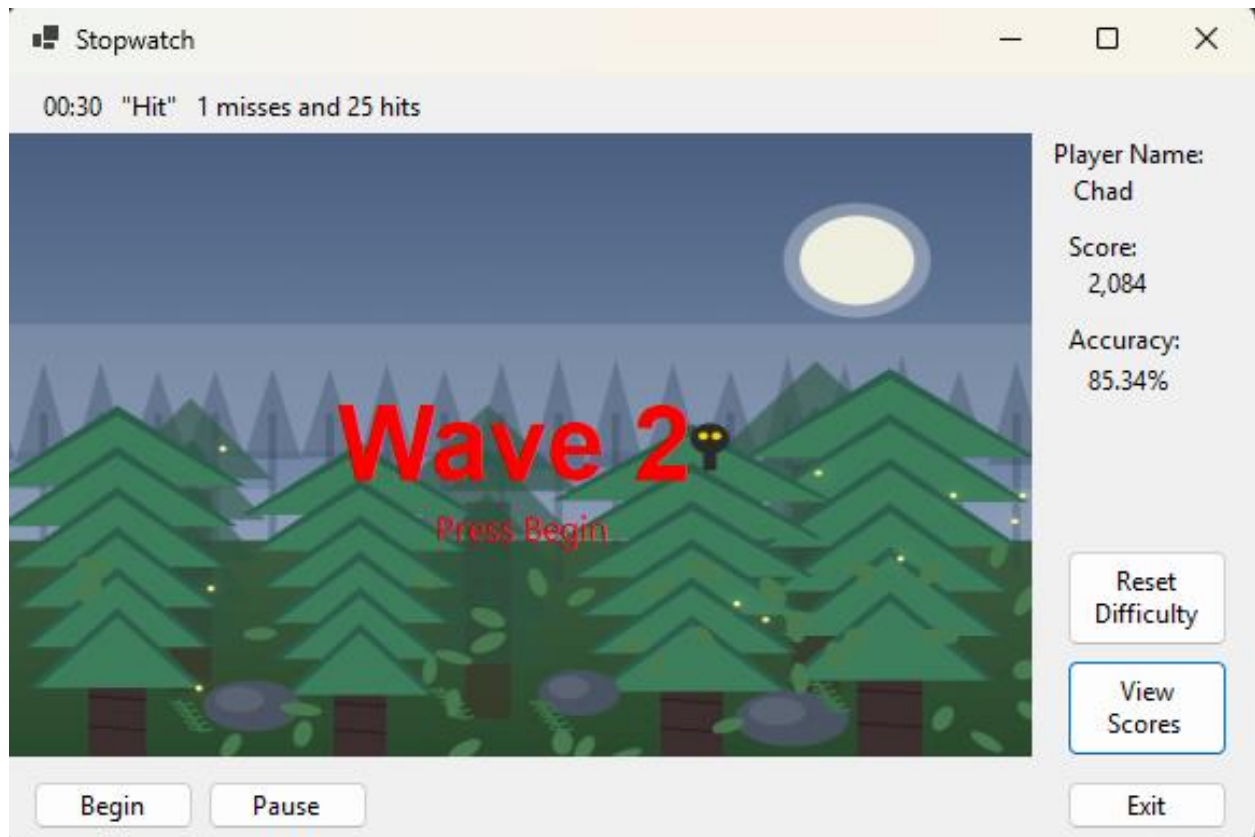

Figure 3-7: Screenshot of the second wave starting. The game has three waves and the timer is sped up slightly each wave.

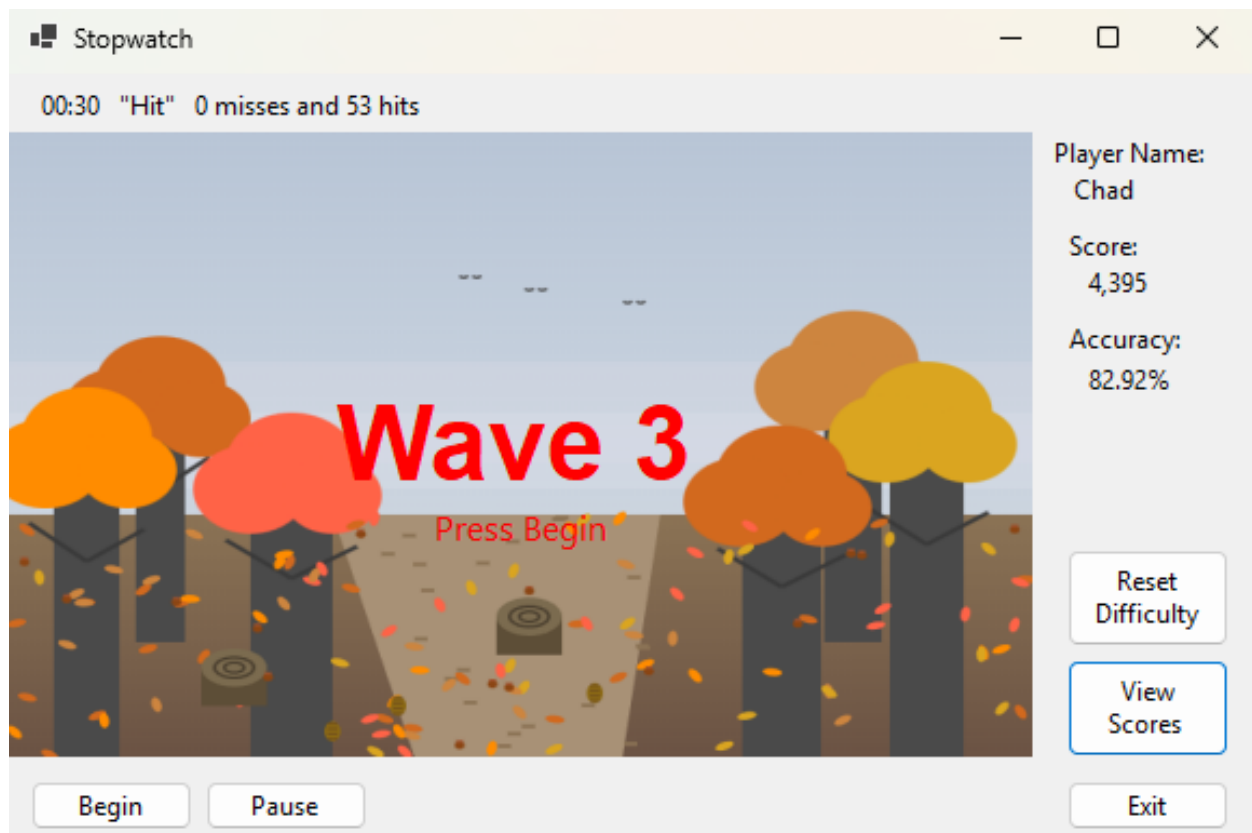

Figure 3-8: Screenshot of start of wave 3

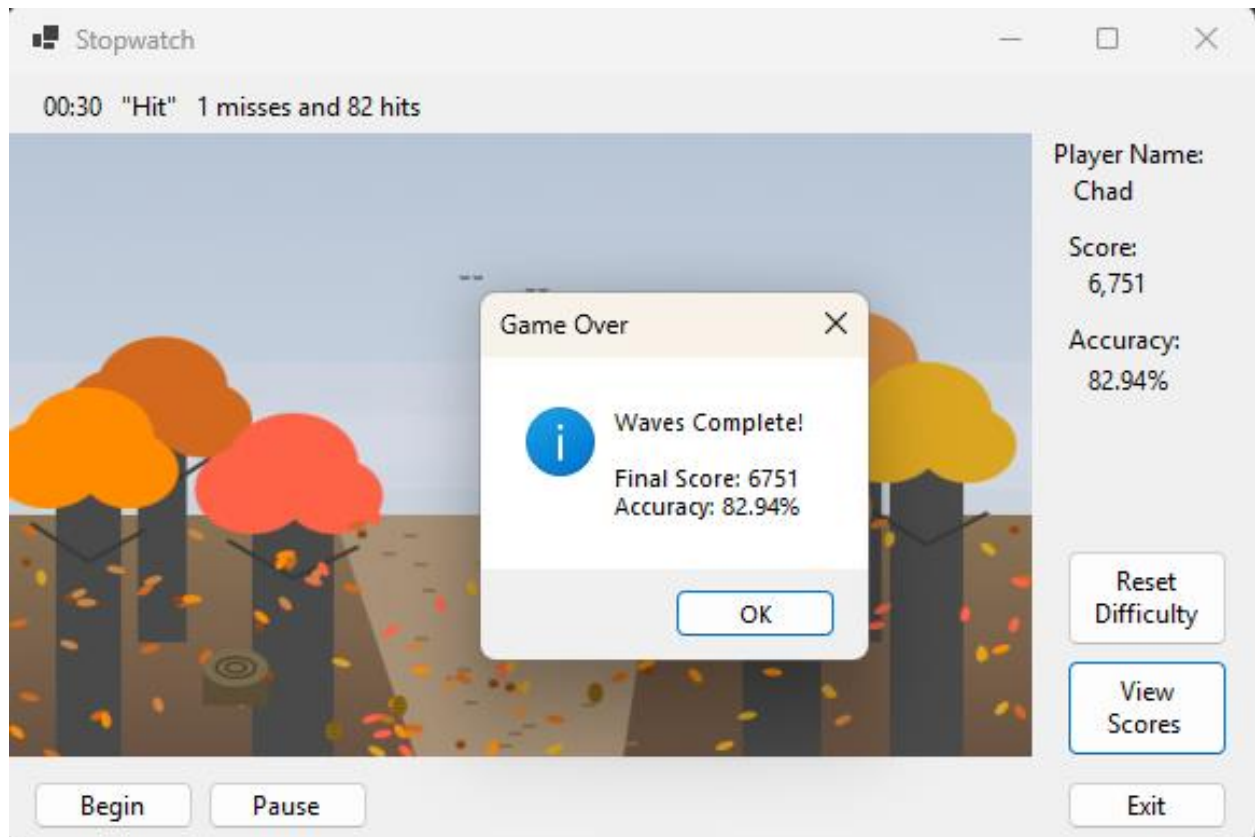

Figure 3-9: Screenshot of Game Ending due completing all the waves

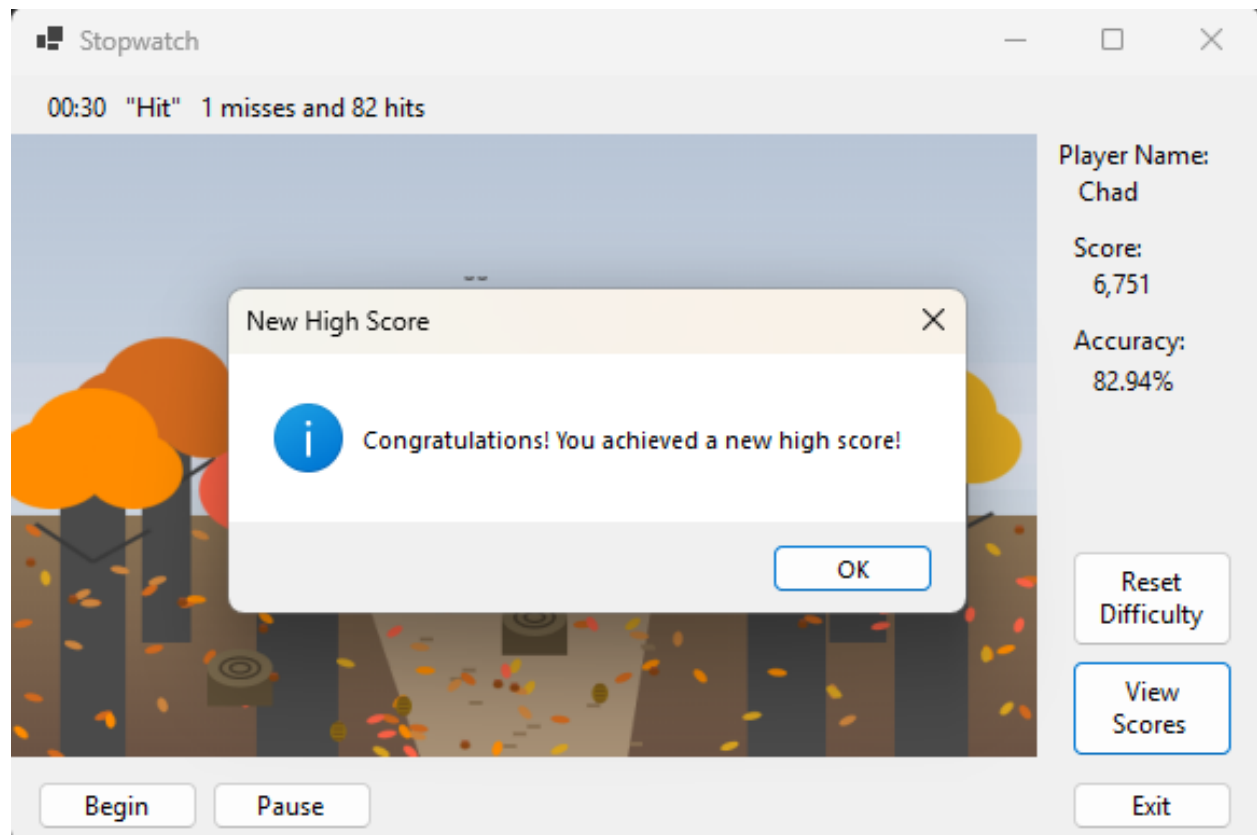

Figure 3-10: Screenshot of high score achieved notification.

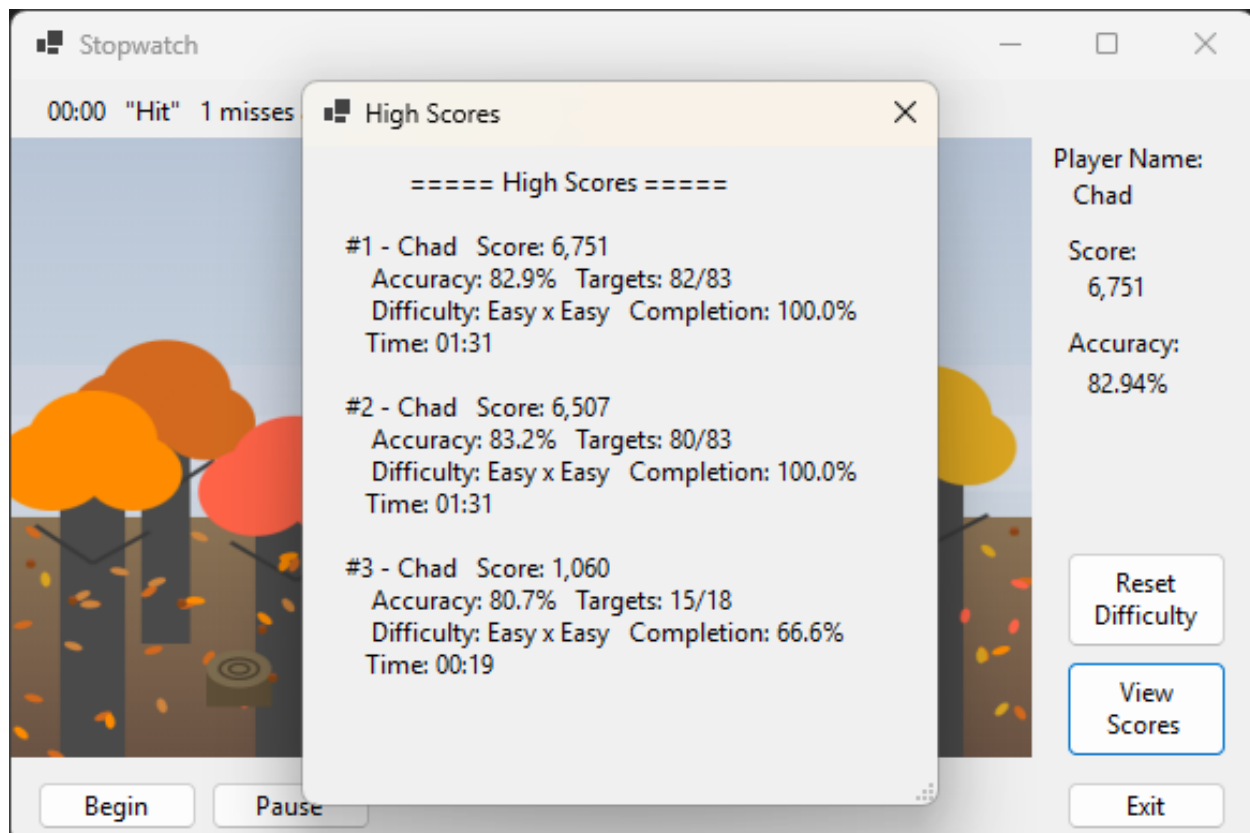

Figure 3-11: Screenshot of list of high scores. Only the top three scores for the given difficulty are ever listed. Changing the difficulty in game changes the list that you will see. (refer to Figure 3-12 for a different list). The player can reset the difficulty and view the list before starting a game to see their target score. The game loads and saves all the scores in the same file then parses by difficulty the needed data as it is requested. This is the way I was leading with the milestone also just a little more refined until midweek I double checked the milestone worksheet and discovered I was doing it out of worksheet scope and had to change thing up drastically in the milestone losing days-worth of work. I have been behind most of the week due to needing to scrap all that work.

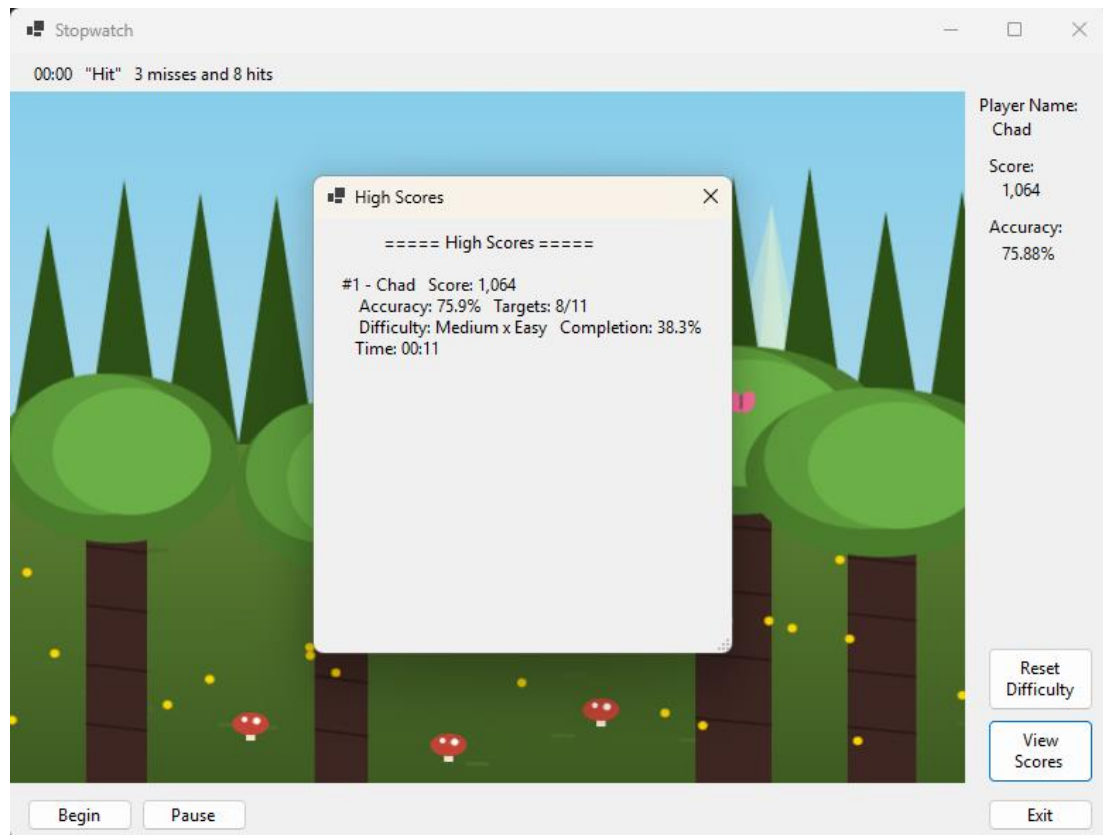

Figure 3-1: Screenshot of list of high scores for a different difficulty. You can see in the difficulty rating it is Medium x Easy.
